SKI ASSOCIATION OF HONG KONG, CHINA

*Cortina 2026
Here We Come!*

CHAIRMAN'S SPEECH

Welcome everyone to the Ski Association of Hong Kong, China's 2025 Annual Dinner! Tonight's occasion is a celebration of the previous season, as well as, a chance to raise funds to further support the Hong Kong Ski and Snowboard Team in their pursuit of participating in international ski events, most notably, the upcoming 2026 Winter Olympic Games in Cortina, Italy.

We kicked off the 2024-25 season with our annual Christmas Training and our 2nd National Ranking Championships in Asahikawa, Japan. The great season continued with our team's participation in the FISU World University Games in Torino Italy, the FIS Alpine World Ski Championships 2025 in Saalbach Austria and the Alpine Junior World Championships 2025 in Tarvisio Italy, and most notably, the Harbin 2025 Asian Winter Games held in Harbin, China. SAHK sent 8 athletes to represent Hong Kong, as part of the largest delegation ever sent by Hong Kong SAR to the Asian Winter Games.

Our most exciting achievement of the season was SAHK's organisation of the 33rd Asian Alpine Championships (Licensed) 2025, held at the National Alpine Skiing Centre in Yanqing, China. Following the success of last year, the championships brought over 70 people from 11 Asian countries/regions to compete in 2 days of Slalom and Giant Slalom races, in this historic Beijing 2022 Winter Olympics venue. With the continued success of this event, SAHK continues to look towards the future as one of the leaders in bringing international attention to winter sports in Asia, and specifically China. With the continued support of the International Ski and Snowboard Federation (FIS), the Asian Ski Federation (ASF), and the Winter Sports Administration of China, we hope to further the development and celebration of snowsports in Asia.

Working towards our goal of attending the Winter Olympic Games and other major alpine events, SAHK continues to organise training camps during the major holidays, including Christmas, Easter, and Summer. As well as sending teams to races all over the world, including Japan, South Korea, China, Bosnia & Herzegovina, Montenegro, Italy, Slovenia, France, Austria and South America.

In the upcoming Olympic season, SAHK hopes to continue providing opportunities and support to our Hong Kong winter athletes to refine their skills, and gain more competition experience in the lead up to the Winter Olympic Games in Cortina 2026.

Finally, I would like to take this opportunity to thank all of our sponsors for their continuous support, all of our fantastic athletes for their hard work in training and competitions, and of course, all the parents for their contribution and patience in supporting the young talent in SAHK in their pursuit of athletic excellence.

Low Level Laser Therapy (LLLT) Biolight

LLLT is also known as Laser Acupuncture, Biolight, Phototherapy, Light Therapy. Red and near-infrared biolight are a "window" of wavelengths that are able to pass through tissue up to 2-8cm, which have beneficial effects on cells by "kick-starting" them into immediately creating more ATP (cellular energy), increasing DNA and RNA activities and activates enzymes in the target cells. It leads to growth factor response within the cells and tissues. Immune system is also strengthened via increased level of lymphocyte activities and stimulation of full body reflexology points. This effect has been carefully studied in many published reports since 1987.

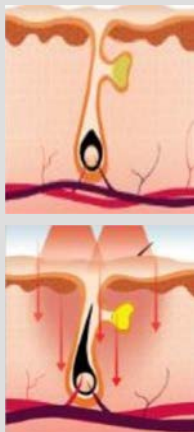

Studies show 820-880nm has the highest penetration power into human tissues.
